

Fishing Tutorial

Case Study

About

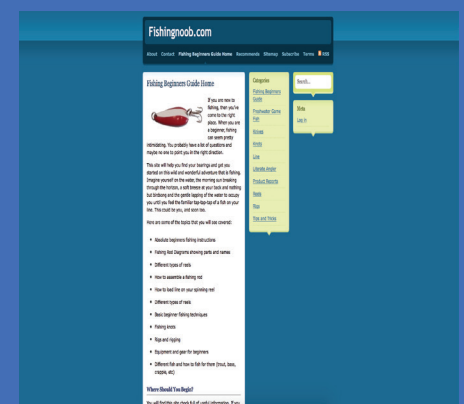

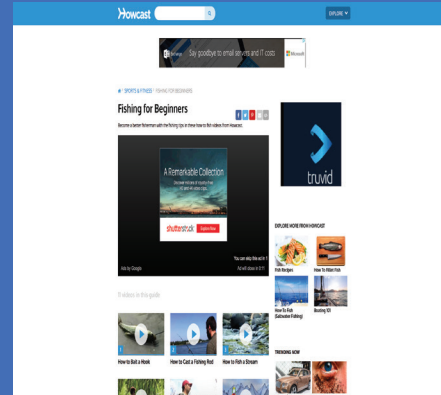

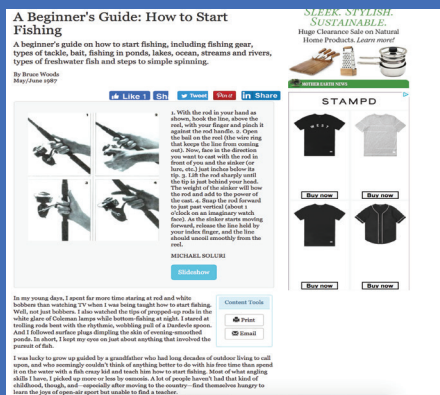

Fishing is a perfect activity to do if you are seeking to get outdoors. Not to mention it's a skill I think everyone should know, but it's also world wide.

Main Goal

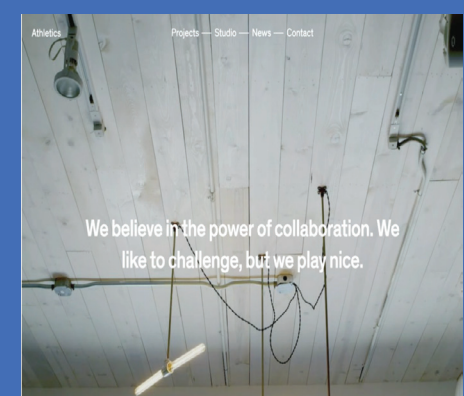

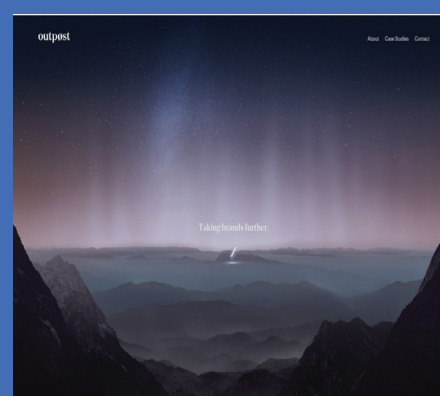

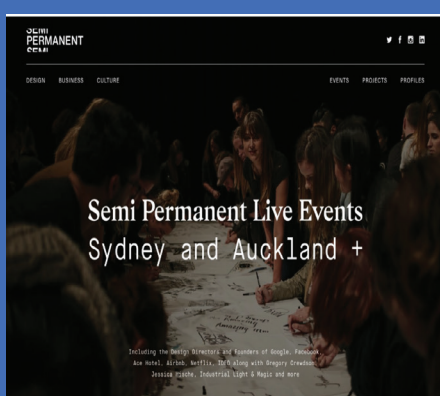

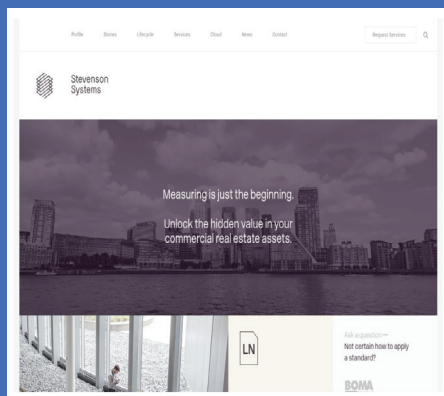

My goal for this website was to show people Fishing tips in simple ways. Everyone of the websites I went on previously was to complicated and confusing. I think they dont have visuals, with videos to make it more simple less confusing. I wanted to make it as easy as possible for someone who has never fished before. I thought of the basic tips and things people need to know in order to catch a Fish.
